MCNEILUS LAUNCHES METRO-PAK AND M2-S REFUSE COMPACTORS IN SAUDI ARABIA

Joint endeavor with Refuse Equipment MFG. Holding Co. is milestone as McNeilus expands in the region.

DODGE CENTER, Minn. (May 13, 2016) – McNeilus Truck & Manufacturing, Inc., an Oshkosh Corporation (NYSE:OSK) company, announced plans to market its McNeilus® Metro-Pak® and M2-S refuse compactor vehicles in Saudi Arabia and the surrounding region. The declaration was made at a ceremony co-sponsored by McNeilus and Refuse Equipment MFG. Holding Co. (REM) at the Ritz-Carlton hotel in Riyadh, Saudi Arabia in late March. McNeilus will work with REM to assemble, market and provide services for the completed vehicles through its extensive network of local service facilities, in combination with support from Oshkosh regional offices and personnel.

“The McNeilus Metro-Pak and M2-S compactor bodies are lightweight and durable and we believe they meet the needs of the Saudi market,” said Chris Zuniga, Oshkosh Commercial Group senior director of international sales and operations. “REM is an excellent company with an outstanding reputation, and we look forward to a long and successful relationship with their entire team.”

The McNeilus Metro-Pak and M2-S compactors will be manufactured in North America and shipped to Saudi Arabia. McNeilus personnel will provide on-site support and REM will assemble and mount the compactors locally onto a wide range of popular chassis. Both products will be marketed to municipal and commercial customers. Oshkosh regional offices and locally based sales and service personnel in Riyadh and Dubai will help support the product, as well as REM’s extensive network of service facilities located throughout Saudi Arabia.

“The event in Riyadh provided us the opportunity to meet with more than 250 industry leaders – representing a wide range of municipalities and private cleaning companies – and to demonstrate the McNeilus Metro-Pak and M2-S in action,” said Zuniga. “The feedback we received was very positive. We are confident these McNeilus compactors – matched with the expertise of the professionals at REM – will benefit communities throughout Saudi Arabia.”

The McNeilus Metro-Pak compactor, which is available in body capacities ranging from 11 to 19 cubic meters, features a large hopper, extensive use of high-resistance steel, and single-piece body panels for improved strength and durability. Its hydraulics and control systems are engineered for top-notch performance, enhanced reliability and ease of maintenance.

The McNeilus M2-S compactor is available in larger body capacities ranging from 13 to 21 cubic

meters. The compactor can be mounted on a single rear axle chassis for enhanced maneuverability, while its compaction force allows for maximum productivity. The M2-S compactor is available with optional Excalibre™ nitrided cylinders feature a larger bore design that provides for long stroke in a compact, powerful package.
