

## Shredding

### OF THE MOST DIFFICULT MATERIALS

Rugged design provides powerful pre-shredding • Extremely large feed area • High throughput with general-purpose use • Shredding drums with extremely aggressive cutting tools

**TERMINATOR**  
Single-shaft shredder

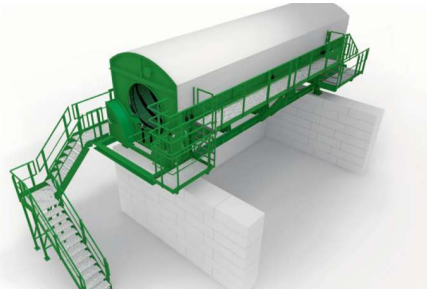

**CRAMBO**  
Dual-shaft shredder

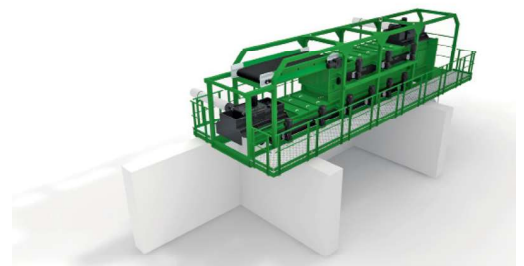

## Screening

### WITH WELL-PROVEN TECHNOLOGY

Variable configuration for perfect adaption to application • Simple speed control at the screen deck to change particle size in seconds • Flexibly tailored solution using drum screen or star screen technology

**DRUM SCREENS**

**STAR SCREENS**

## Separating

### USING MULTI-PURPOSE MACHINES

Outstanding windsifting performance using pressure-suction and vibration • Low energy costs due to electrical drive of components • High degree of selectivity with setting of separation limit

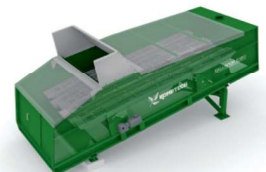

**HURRIKAN**  
Windsifter

**STONEFEX**  
Stone separator

**HURRIFEX**  
Stone and light material separator

**BALLISTOR**  
Ballistic separator

## APPLICATIONS

household waste

commercial waste

forestry waste

green waste

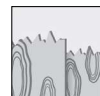

bulky waste

root stocks

tires

waste wood

compost

biomass

waste

bark wood chips
